

Journal Of Food Process Engineering

Journal Of Food Process Engineering - The Journal of Food Process Engineering publishes the best original research on applications of engineering principles and concepts to food and food processes. The processes include any physical properties and changes to the food product that result in preservation of the food, extending to transportation, product shelf-life, or improvements in the product quality attributes. This international research journal focuses on the engineering aspects of post-production handling, storage, processing, packaging, and distribution of food. Read by researchers, food and chemical engineers, and industry experts, this is the only international journal specifically devoted to the engineering aspects of food processing. The Journal of Food Process Engineering is a peer-reviewed scientific journal that covers research on applications of engineering to food and food processing. It was established in 1977 and is published by Wiley-Blackwell. The journal moved to online-only publication in 2011. According to the Journal Citation Reports, the journal has a 2018 impact factor of 1.955.
